

IoT Module

IoT has the GPRS communication function. It can connect with remote Cloud Server, and it has one Infrared communication port, to read and program the specifications and status of solar charge controller.

Item	IoT401
Voltage	8V/50V
Technology	2G/3G/4G
Telecom company	N/A
Ambient temperature	-45°C-65°C
Protect Level	IP68
Size	72mm*66mm*21mm

- Work with solar lighting charge controllers with Infrared interface.
- Switch on or off the load remotely.
- Read the real-time information of battery/load/PV panel, connecting with solar controller.
- Program and read the specs of solar controller remotely.
- With GPRS telecom station positioning function.
- Support remote firmware upgrade.
