

MPPT-DC series

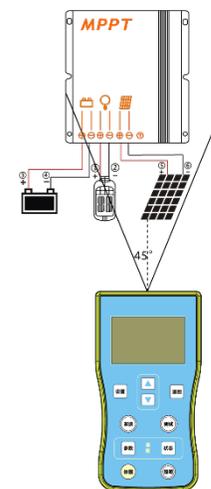

MPPT Solar charge controller

- 5 stages time and dimming can be adjusted
- AGM, Liquid, GEL and Lithium battery for selection
- 0°C Charging Protection(Lithium)
- Remote Unit to configure, with LCD display

Remote controller

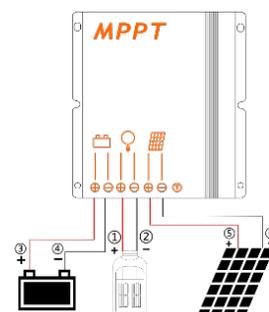

Setting can be changed using the "S/SG-Unit" infrared remote programmer. For detailed instructions and settings, please see the S/SG-Unit programmer remote manual.

Description of Function

MPPT-DC series intelligent MPPT solar controller is programmable and especially for boost mode LED solar street light system. It includes constant current driver function. The charging efficiency is about 20% higher than the traditional PWM controller, which can drop the cost of the whole system.

- Innovative Max Power Point Tracking(MPPT) technology, tracking efficiency >99.9%
- Full digital technology, high charge conversion efficiency up to 97.5%, discharge conversion efficiency up to 96.5%
- Can output constant current (output current can be set)
- Can read parameters and running status
- If battery voltage is low, it can be set to dimming
- Dimming start voltage and percentage can be set
- Day/Night threshold can adjust automatically
- When BMS power off because of LVD, it can activate the system automatically
- External temperature sensor, automatic temperature compensation(AGM, Liquid and GEL)
- Four stages charge way: MPPT, boost, equalization, float
- IP67, Strong and durable aluminum case Full automatic electronic protect function

The following diagrams provide an overview of the connections and the proper order.

Hot plugging is prohibited!
Please connect the inductive sensor to R series controller first!
