

Smart-CC series

Solar charge controller

SMR1006-CCN5M/Li

Functions

Smart-CC series intelligent solar controller, is programmable and especially for buck mode LED solar street light system.

It includes constant current driver function, which can make the cost of the whole system much lower.

It comes with some outstanding features, such as:

- Can output constant power, output power can be set.
Accuracy: 0.5W, Min power: 0.3W
- Automatic power balance 365 mode, 365 days can be lit.
- 5 stages time and dimming can be adjusted, dimming 0~100%
- Can read parameters and running status
- Suitable for Lithium battery
- If battery voltage is low, it can be set to dimming automatically
- Dimming start voltage and dimming percentage can be set
- Auto sleeping during transportation
- Low temperature charging protection
- When BMS power off because of LVD, it can activate the system automatically
- Charging target voltage and charging recovery voltage can be set
- Day/Night threshold can adjust automatically
- Remote Unit to configure, with LCD display
- IP67, Strong and durable aluminum case
- Full automatic electronic protect function
